

LOGO PACKAGE

Your logo has been supplied in various formats.

Some formats are better suited for certain applications.
Please see below for the best format for your needs.

RASTER IMAGES

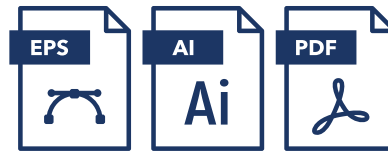

JPEG

Raster RGB image. JPEGs are compressed images that are not ideal for printing.

PNG

Raster RGB image with transparent background.

These formats are best used for internal use (Microsoft office, Google Docs, etc.) or on websites.

VECTOR BASED

(fully scalable without losing resolution)

EPS*

EPS should be used for **all professional** printing such as stationery, signage, brochures, promotional products (t-shirts, mugs, vinyl lettering, etc.)

AI*

Editable industry standard vector file.

SVG*

Editable vector file. Ideal for websites.

*Note: You may not be able to open the .ai and .eps files on your computer. These are the files that Industry Professionals will want.

PDF

Universal vector format that can be viewed by anyone.
